

# Does your agency have Commercial and/or Residential Contractors as current or prospective clients?

If the answer is yes, this information is important to your clients.

Beginning April 2010, the United States Environmental Protection Agency (USEPA) will begin enforcing a regulation aimed at preventing lead poisoning. Contractors performing renovation, repair or painting projects that disturb lead-based paint in the following areas must be certified and follow lead-safe work practices:

- pre-1978 homes
- child care facilities
- schools

This presents exposures to your clients that can be covered by a **Contractors Pollution Liability** policy.

Arlington/Roe has a number of environmental markets that write this coverage for all sizes of contractors. We can also include coverage for other exposures such as mold, transportation of pollutants, non-owned disposal sites as well as work performed by or on behalf of the named insured by subcontractors.

If you are interested in getting more information or receiving an application please contact an Arlington/Roe.
